## **(ERESIDENCY)**

### **PROBLEM STATEMENT:**

It can be difficult, costly, and at times disappointing to move around campus searching for areas of accommodation/residency.

A lot of students start their university life fresh and sober, but with time they end up getting frustrated, attaining bad grades, and for the worse, dropping out.

According to a survey carried out by Computer Science Group 31 members in Makerere University, it was found out that this problem is attributed to the fact that most of these students fail to locate suitable places of accommodation where they would come from to attend lectures at campus and this has led to some of them give up the search and reside to commuting, which is more expensive to those who live far from the University, thus making them miss out lectures on days they don't get transport money. We know that attending daily classes at the campus is very important and leads to better performance as well as attaining the right information and skills from lecturers and professors.

### **VIABLE SOLUTION:**

There's an opportunity to help these students stay on campus and improve their grades. Helping them locate halls, hostels, and rentals around campus that have got available beds spaces and prices for each enables them to analyze which of these places are suitable for them in terms of prices for accommodation and location from their respective colleges. This could also reduce the time and money spent looking for accommodation around campus.
